ARNORTH Operations Summary

The JFLCC continues to support CBP border mission priorities (consistent with approved RFAs).

Additionally the JFLCC:

- 1) Continues CONOP refinement regarding RFA #7 (Paint Application Test) as new information is gathered.
- 2) Refines RFA #8 CONOP (JRSOI plan) based on recently received JS recommended sourcing solutions which are pending next SDOB.
- 3) Submitted "Change Request" to USNORTHCOM to cover the increased personnel numbers (36 pax (22 x USMC and 14 x Army)) required to address the MSC operator expansion request from CBP (146 to 155 MSC sites).

RFA #9 Preparation. CDR, 89th MP BDE has identified the appropriate forces to source against the tent construction mission at the CBP requested six sites along the SWB. Force structure is comprised of 1 x EN BN HQs (-) and 2 x EN COs. The JFLCC staff is coordinating for the execution of combined site surveys (CBP, ICE, 19th EN BN HQs (-), Logisticians, and potentially a USACE SME) to be conducted over the next two weeks (AWCB priority sites). Site survey teams will derive site preparation, billeting, and wrap-around service requirements specific to each site IOT inform follow-on CONOP and LOGCAP contract development.

Migrant Update. As of today, the total number of migrants within 11 groups is approximately 13,950. This number is based on CBP reporting IVO Nuevo Laredo, MX which is pending confirmation. The JFLCC continues to monitor any significant changes to the migrant numbers and dispositions, as well as, massing indicators.
